

6 Easy Steps to Get the Hot Tub Going – allow 2 hours

- 1) Fill the tub half full (or until water runs cold) using hot water hose attached to the stone
- This will empty the hot water from the tank in the Pool House
- 2) Put the cover on the tub (strap it on if it's windy) and go away for 40 mins
- The hot water tank will heat up again
- 3) Fill the tub to cover the black outlet disc, again using just the hot tap hose.
- 4) Once the tub is full **ONLY NOW** light the fire in the fire barrel. Do not light the fire before filling the tub as it will seriously damage the pipework. Firewood located in the Cottage porch. Kindling in the utility rooms.
- 5) Put the lid on the fire barrel once it has started, to help it burn better, keep feeding the fire to keep the water toasty
- 6) Give it a stir....and enjoy!

Safety Notice - Be Careful!

Open fires and very hot water are dangerous. Always stir the water with a big stick before getting in as the surface layer of water can become much hotter than in the body of the tub. Always check the temperature before entering!!! Only hold the lid of the fire barrel by the outer handles as the rest gets extremely hot. Children may never use the hot tub unsupervised. Please extinguish the fire and strap the cover on the tub after use if leaving the area. In case of a fire please dial 999 for emergency assistance from the houses.
